SUBJECT INDEX TO VOLUME 40

3-D Numerical Model, for Open-Channel Flows, Verification and Validation of, 431

Artificial Compressibility Method, for Incompressible Flows, An, 391

Computation, of Convection-Diffusion Problems, Differenced with High-Order, Upwind Schemes, 163
Control-Volume Finite-Element Method (CVFEM) for Unsteady, Incompressible, Viscous Fluid Flows, A, 61
Convergence Characteristics, of Temperature, in Radiation Problems, 303

Finite-Difference-Based, Lattice Boltzmann Method, for Inviscid Compressible Flows, 1
Finite-Element Analysis, of Heat Conduction Problems, with Irregular Region Boundary, Using Multilevel Techniques, 179
Finite-Element Modeling, of Coupled Radiative, and Diffusive Heat Transfer, in Nonparticipating Media, Including Symmetry, and Periodicity Conditions, 229

GCG Methods, for the Efficient Solution of Matrix Problems, Arising from the FVM Formulation, of Radiative Transfer, Use of, 515
Gradient Approximations, for Use in Finite-Volume, Computational Methods, for Two-Dimensional, Diffusion Equations, A Comparison of, 367

Improved PISO Algorithm, for the Computation, of Buoyancy Driven Flows, An, 473
Interfacial Pressure Jump Model, for Two-Phase Bubbly Flow, An, 83

Multigrid Acceleration, of Computations, of Turbulent, Particle-Laden Flows, 139

New Benchmark Quality Solution, for the Buoyancy-Driven Cavity, by Discrete Singular Convolution, A, 199
New Velocity-Slip Model, for Separated Gas Microflows, Validation of a, 451
Nonlinear, Optimal Control Problem, in Determining the Strength, of the Optimal Boundary, Heat Fluxes, 411
Nonlinear, Transient, Heat Conduction Analysis, with Precise Time Integration Method, 325
Numerical Analysis, of Non-Fickian Diffusion Problems, in a Potential Field, 265
Numerical Implementation, of Nonlinear Viscoelastic Models, in a Finite-Volume Method, On the, 283
Numerical Stability, and Boundedness, of Convective Discretized Scheme, Discussion on, 343

Procedure, for View Factor Calculation, Using the Finite-Volume Method, A, 23

Reverse Time Modeling, of Thermal Problems, Using the Transmission Line Matrix Approach, 249

Semiexplicit Method for Wall Temperature Linked Equations (SEWTLE): A General Finite-Volume Technique, for the Calculation, of Complex Heat Exchangers, 37
Spray–Wall Interaction Model, Considering Degree of Superheat, in the Wall Surface, A Study on, 495

Unified Formulation, of the Segregated Class, of Algorithms, for Multifluid Flow, at All Speeds, A, 99

CONTENTS TO VOLUME 40

CONTENTS Vol. 40, No. 1

1 Finite-Difference-Based Lattice Boltzmann Method for Inviscid Compressible Flows **Weiping Shi, Wei Shyy, and Renwei Mei**

23 A Procedure for View Factor Calculation Using the Finite-Volume Method **John C. Chai, Jeffrey P. Moder, and Kailash C. Karki**

37 Semiexplicit Method for Wall Temperature Linked Equations (SEWTLE): A General Finite-Volume Technique for the Calculation of Complex Heat Exchangers **José M. Corberán, Pedro Fernández de Córdoba, José Gonzálvez, and Francisco Alias**

61 A Control-Volume Finite-Element Method (CVFEM) for Unsteady, Incompressible, Viscous Fluid Flows **João Batista Campos Silva and Luiz Felipe Mendes de Moura**

83 An Interfacial Pressure Jump Model for Two-Phase Bubbly Flow **Moon-Sun Chung, Sung-Jae Lee, Won-Jae Lee, and Keun-Shik Chang**

CONTENTS Vol. 40, No. 2

99 A Unified Formulation of the Segregated Class of Algorithms for Multifluid Flow at All Speeds **M. Darwish, F. Moukalled, and B. Sekar**

139 Multigrid Acceleration of Computations of Turbulent Particle-Laden Flows **Xi-Qing Chen**

163 Computation of Convection-Diffusion Problems Differenced with High-Order Upwind Schemes **Shaw-Ching Sheen**

179 Finite-Element Analysis of Heat Conduction Problems with Irregular Region Boundary Using Multilevel Techniques **Wu-Yao Chiou and Rong-Tsong Lee**

CONTENTS Vol. 40, No. 3

199 A New Benchmark Quality Solution for the Buoyancy-Driven Cavity by Discrete Singular Convolution **D. C. Wan, B. S. V. Patnaik, and G. W. Wei**

229 Finite-Element Modeling of Coupled Radiative and Diffusive Heat Transfer in Nonparticipating Media Including Symmetry and Periodicity Conditions **Jean-Michel Bergheau and Franck Potier**

249 Reverse Time Modeling of Thermal Problems Using the Transmission Line Matrix Approach **I. Badger, S. H. Pulko, and A. J. Wilkinson**

265 Numerical Analysis of Non-Fickian Diffusion Problems in a Potential Field **Han-Taw Chen and Kuo-Chi Liu**

CONTENTS Vol. 40, No. 4

283 On the Numerical Implementation of Nonlinear Viscoelastic Models in a Finite-Volume Method **Paulo J. Oliveira**

303 Convergence Characteristics of Temperature in Radiation Problems **Hong-Mo Koo, Hojin Cha, and Tae-Ho Song**

325 Nonlinear Transient Heat Conduction Analysis with Precise Time Integration Method **Biaosong Chen, Yuanxian Gu, Zhenqun Guan, and Hongwu Zhang**

343 Discussion on Numerical Stability and Boundedness of Convective Discretized Scheme **B. Yu, W. Q. Tao, D. S. Zhang, and Q. W. Wang**

CONTENTS Vol. 40, No. 5

i Professor Suhas V. Patankar on His 60th Birthday **J. C. Chai, R. B. Baliga, K. C. Karki, K. M. Kelkar, A. Radmehr, W. J. Minkowycz, and E. M. Sparrow**

367 A Comparison of Gradient Approximations for Use in Finite-Volume Computational Models for Two-Dimensional Diffusion Equations **P. A. Jayantha and I. W. Turner**

391 An Artificial Compressibility Method for Incompressible Flows **M. M. Rahman and T. Siikonen**

411 A Nonlinear Optimal Control Problem in Determining the Strength of the Optimal Boundary Heat Fluxes **Cheng-Hung Huang**

431 Verification and Validation of a 3-D Numerical Model for Open-Channel Flows **Jianchun Huang, Yong G. Lai, and V. C. Patel**

CONTENTS Vol. 40, No. 6

451 Validation of a New Velocity-Slip Model for Separated Gas Microflows **Ali Beskok**

473 An Improved PISO Algorithm for the Computation of Buoyancy-Driven Flows **Paulo J. Oliveira and Raad I. Issa**

495 A Study on the Spray–Wall Interaction Model Considering Degree of Superheat in the Wall Surface **Changsik Lee, Kihyung Lee, Jiro Senda, and Hajime Fujimoto**

515 Use of GCG Methods for the Efficient Solution of Matrix Problems Arising From the FVM Formulation of Radiative Transfer **C. K. Krishnaprakas, K. Badari Narayana, and Pradip Dutta**
